Powersports

Carbon Metallic®

Compound Descriptions

95 Compound - Progressive Feel

Champions such as Troy Bayliss, Steve Hislop, Shane Byrne and John Reynolds choose 95 compound for its excellent release and moderate initial bite, which yields a more progressive feel. Excellent controllability with a slight torque rise for a more balanced suspension at high corner entry speeds. Virtually fade free with excellent wear rate. 95 compound can be used on either stainless steel or iron discs.

05 Compound - High Bite

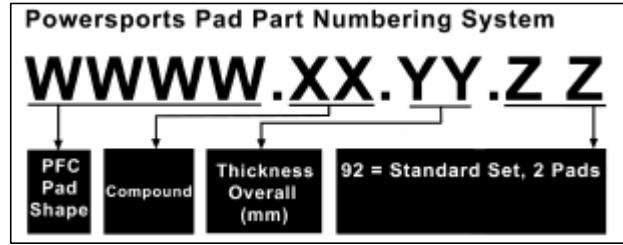

The standard by which all brake pads are now judged, 05 compound won more world and national championships in 2005 than any other brake pad on the market. Riders such as Pere Riba, Ben Bostrom, Tommy Hill, Brendan Roberts, and John McGuinness choose 05 for its higher initial bite and higher average torque, which demands more from motorcycle setup. Virtually no torque rise or torque scatter for superior performance and rider feedback in the worst conditions (wet or dry). Fade free with the best wear rate of all the compounds. 05 can be used on either stainless steel or iron discs.

Z Rated - Street Compound with ECER90 APPROVAL

The newest addition to the PFC range, championship winning technology was directly applied to the development of our new Z Rated Carbon Metallic street compound, the most advanced pad material on the market today. Z rated Carbon Metallic pads provide racer like power and control with superior pad and disc wear. EX 7535.10
